***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 4-14 rejected under 35 U.S.C. 102(b) as being clearly anticipated by DeCamp et al.(U.S.Pat.4,920,254).

***Response to Arguments***

Applicant's arguments filed 5-8-2007 have been fully considered but they are not persuasive. Regarding Applicant's claim that the cited reference does not show a sol-gel precursor please note a precursor is a compound that participates in the transformation into another compound, as such the recitation that " a layer is based on a sol-gel precursor" is strictly speaking a negative limitation, since it is claiming something no longer present. Also the method of forming a product is not germane to the issue of patentability. Regarding Applicant's claim that the cited reference does not show "the electrical domestic appliance" please note that where and how a product is used is not germane to the issue of patentability and clearly the cited reference is an electrical appliance.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Abbott, Courand, Abbott'543 and Ito are cited to show structure similar to the claimed invention.
